Official Edition — Complete Operational & User Guide

REESH

Poultry Farm Management System

Complete User Guide

From download and 15-minute setup to daily farm operations: a practical step-by-step illustrated guide for farm owners, supervising vets, farm engineers, field veterinarians, and accountants.

Company Owner | Supervising Vet | Farm Engineer | Field Veterinarian | Accountant

Quick Start: Download & Install

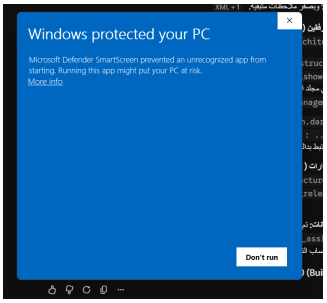

Running Reesh on computer, phone, and browser.

1 **Open the Official Download Portal**

Visit the official Reesh portal (reesh-erp.vercel.app) and select your platform: Windows installer, Android phone app, or instant web access.

2 **Install on Windows & Bypass Security Prompt**

When launching the installer, a blue "Windows protected your PC" prompt may appear. Click "More info" then "Run anyway" to complete setup.

3 **Install on Your Android Phone**

Download the APK on your Android phone, allow installation when prompted once, and launch the app.

Operational Tip

Managers and accountants work comfortably on PC, while engineers log data from their phones inside the barn with instant sync.

Quick Start: Sign-In & Activation Code

Steps for existing users and new company registration.

1 **Sign In to an Existing Account**
Enter your registered email and password on the login screen and press "Sign In".

2 **Register a New Company with Activation Code**
Click "Register New Company with Activation Code", enter your code, press "Verify", and fill in company and owner details.

3 **Request a Free 21-Day Trial Code**
If you do not have a code, click the WhatsApp trial link at the bottom of the login screen to receive a 21-day free evaluation code.

Transferring License to a New Device
Your activation code covers a set number of devices per tier. When replacing hardware, release the old device and activate the new one for free.

All rights reserved © Reesh 2026

Quick Start: First Farm & First Cycle

Four practical steps to launch production.

1 **Add Your Farm & Select Activity**
From the side menu select "Farms" -> "Add Farm", then enter farm name, location, barn count, and production type.

2 **Configure Barns & Capacities**
Define bird capacity for each barn so the system accurately tracks density and feed intake.

3 **Start a New Flock Cycle**
From "Cycles" press "New Cycle", choose breed (e.g., Ross 308, Cobb 500), placement date, chick count, and initial age.

4 **Assign the Farm Engineer**
Assign the responsible engineer so the flock appears on their phone immediately for daily reporting.

Stage (Hypothetical Example)	Entered Data	Responsible Role
Add Farm	Al-Amal Farm – Barn 1 & Barn 2	Company Owner / Supervisor
Flock Placement	24,500 Chicks (Age: Day 1)	Supervising Vet
Daily Operations	Log mortality, feed, and weights	Farm Engineer

All rights reserved © Reesh 2026

Company Owner Guide

Complete oversight across all farms and financials.

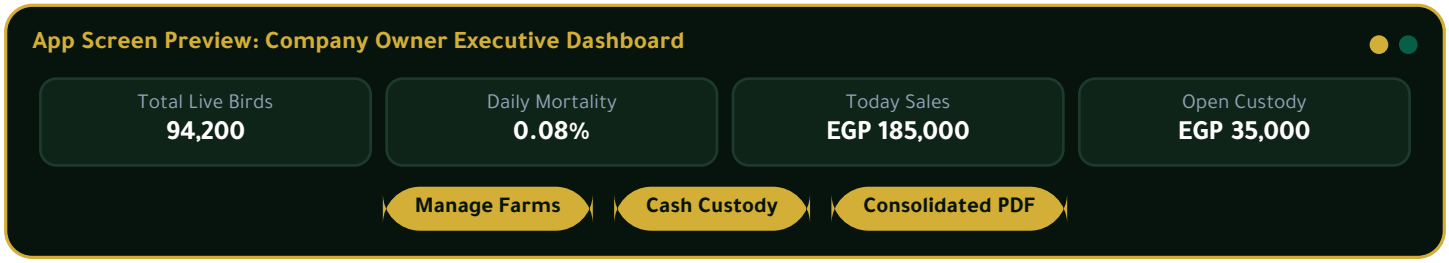

Company Owner / General Manager

Highest administrative, financial, and operational authority

Your Core Responsibilities:

- Monitor consolidated KPIs: live bird counts, mortality rates, and weights across all farms.
- Add team members (supervising vets, engineers, field vets, accountants) and assign farms.
- Record and audit attendance for veterinarians and agricultural engineers.
- Review and approve cash advances, payment/receipt vouchers, and flock/egg sales.
- Upload the official company logo in Settings to appear on all printed PDF reports.

Permission Scope: Full access to all modules; clinical protocol edits are best delegated to the supervising vet.

Morning Routine for the Owner

Check the dashboard alerts each morning; any red alert on a barn warrants an immediate check with the supervising vet.

All rights reserved © Reesh 2026

Supervising Vet Guide

Technical oversight, cycle setup, and health programs.

Supervising Veterinarian (Technical Admin)

Primary lead for biological performance, engineers, and health plans

Your Core Responsibilities:

- Open new flock cycles and benchmark weights and feed intake against breed standards.
- Assign engineers to farms, add co-engineers, or replace engineers while preserving history.
- Record daily attendance, leaves, and absences for engineers and field vets.
- Customize vaccination and medication schedules in the cycle health protocol.
- Review and approve one-time backdated report requests from farm engineers.

Permission Scope: Cannot approve final financial custody settlements or modify company owner accounts.

Early Warning Indicator

Monitor daily water intake closely; a sudden drop in water consumption precedes clinical illness by 24 to 48 hours.

All rights reserved © Reesh 2026

Farm Engineer Guide

Your daily field workflow inside the barn.

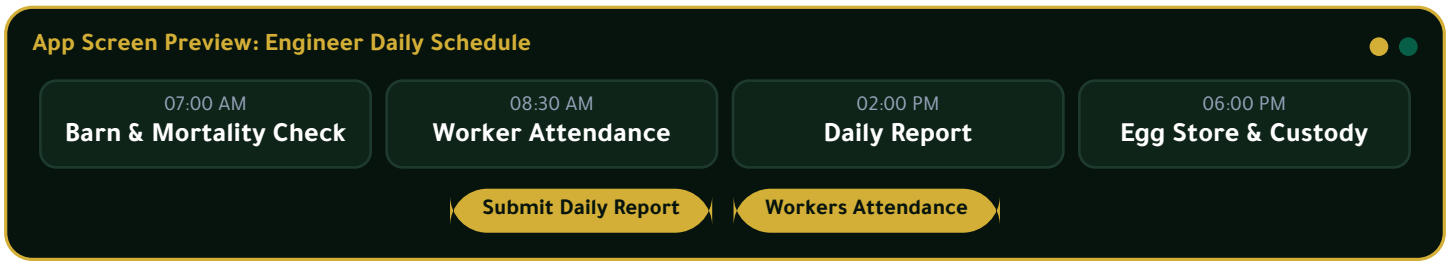

Field Farm Engineer

Directly responsible for barn management and daily logging

Your Core Responsibilities:

- Submit the daily barn report: day/night mortality, feed consumed, water, climate, and weights.
- Log administered treatments and link them to scheduled health protocol items.
- Record daily attendance and leaves for farm workers.
- Manage daily egg store ledger and dispatch vouchers on layer and breeder farms.
- Record emergency farm expenses against assigned petty cash custody with invoice numbers.

Permission Scope: Restricted to assigned farms; cannot alter veterinary protocol schedules or backdate reports without approval.

Duplicate Feed Protection

The app automatically cascades bird and silo balances day-to-day and prevents double-counting barn feed.

All rights reserved © Reesh 2026

Field Veterinarian Guide

Clinical inspection, treatments, and withdrawal safety.

Field Veterinarian

Flock health monitoring and food safety enforcement

Your Core Responsibilities:

- Inspect assigned farms regularly to evaluate flock vitality, weights, and uniformity.
- Update health protocols and add emergency treatments with statutory withdrawal days.
- Monitor 24-hour advance vaccination alerts to ensure cold-chain vaccine readiness.
- Record daily attendance for farm engineers across assigned farms during field visits.
- Approve or reject engineer requests to open missed daily reports.

Permission Scope: Does not modify payroll sheets, treasury vouchers, or financial sales ledgers.

Consumer Safety & Withdrawal Hold

When an antibiotic with withdrawal days is logged, a red safety banner blocks bird or egg marketing until the hold expires.

All rights reserved © Reesh 2026

Accountant Guide

Treasury control, custody settlement, sales, and payroll.

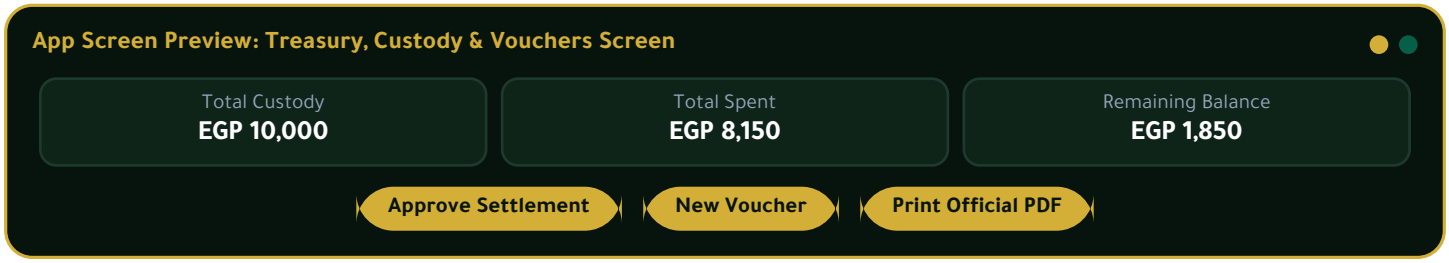

Financial Accountant / Account Manager

Full financial document lifecycle with read-only technical visibility

Your Core Responsibilities:

- Open petty cash custody sheets for engineers, audit expense invoices, and approve settlements.
- Issue and approve receipt and payment vouchers (cash, cheque, bank transfer).
- Audit egg and bird sales dispatches and reconcile delivery vouchers with collections.
- View and print monthly attendance sheets for workers, engineers, and vets for payroll.
- Export and print all cycle, barn, custody, and voucher reports in official PDF format.

Permission Scope: Strict security isolation: full read/print access to technical and attendance data without edit rights.

Automated Amount Wording (Tafqeet)

The system automatically converts numeric amounts into formal written words on all vouchers to prevent tampering.

All rights reserved © Reesh 2026

Farms, Barns & Multiple Engineers

Assign co-engineers and replace staff with full history.

1 **Assign an Additional Co-Engineer**

When assigning an engineer to a farm that already has one, choose "Co-Engineer" so both work together with full permissions.

2 **Smart Replacement & Custody Check**

Choosing "Replace Engineer" checks for any open cash custody, alerts management, and immediately revokes the old login session.

3 **Historical Audit & Prorated Monthly Payroll**

All past reports and attendance of the replaced engineer remain preserved under "Former Engineer" for accurate prorated payroll.

Farm Role	Engineer Name (Hypothetical)	Work Period	Account & Records Status
Primary Engineer	Eng. Ahmed	Oct 01 - Present	Active – Full Access
Co-Engineer	Eng. Mahmoud	Oct 15 - Present	Active – Full Co-Access
Former Engineer	Eng. Mostafa	Oct 01 - Oct 10	Deactivated – History Kept for Payroll

All rights reserved © Reesh 2026

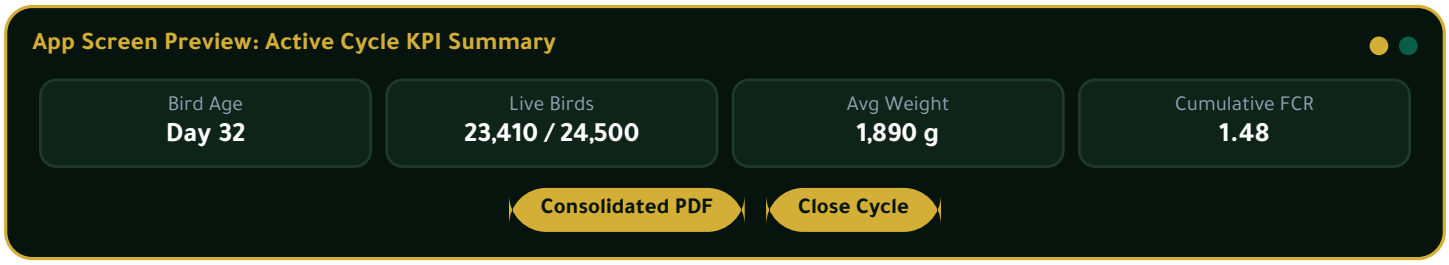

The Four Production Sectors & Cycles

The system adapts its screens and formulas to your sector.

1. **White Broilers & Sasso Colored Broilers**
   Daily tracking of body weights, mortality, feed intake, and FCR benchmarked against standard breed catalogs.

2. **Commercial Table Layers & Rearing Capitalization**
   Tracks Rearing, Pre-Lay, Production, and Molting stages, alerting you at 5% Hen-Day to capitalize rearing costs.

3. **Broiler Breeders & Hatchery Batches**
   Separates female and male mortality/feed, excludes males from Hen-Day %, and tracks hatchery setting, fertility, and hatchability.

All rights reserved © Reesh 2026

The Daily Barn Report

Structured 60-second daily logging with automatic balance cascade.

1 **Per-Barn Mortality Logging**
Enter day and night mortality per barn; the system automatically deducts it from opening stock to update live bird counts.

2 **Incoming Feed, Consumption & Silo Balance**
Record incoming feed and per-barn consumption; remaining silo stock and FCR are calculated automatically.

3 **Water, Lighting & Periodic Weights**
Log water liters, lighting hours, and sampled weights, with a one-click request workflow if a past day was missed.

Logged Item	Value (Example)	Standard Benchmark	Cascade Status
Daily Mortality	18 Birds	0.07% (Normal)	Deducted from barn stock
Feed Consumed	1,450 kg	118 g / bird	Deducted from silo balance
Water Intake	2,900 Liters	2:1 Water-to-Feed ratio	Healthy vitality indicator
Average Weight	1,890 g	+50 g above standard	Excellent growth

All rights reserved © Reesh 2026

Health Protocols, Vaccines & Safety Period

Extended 500-day protocols and smart treatment matching.

1 **Age-Matched Vaccination Schedules**

Built-in health programs tailored for White Broilers (38d), Sasso (77d), and Layers/Breeders (up to 500 days).

2 **Auto-Matching & Combined Drug Splitting**

Logging a treatment in the daily report automatically marks the protocol item complete; combined (+) drugs split with one tap.

Marketing Hold Alert During Withdrawal

Example: Barn 1 is under an active drug withdrawal hold until 2026-11-04; marketing birds or eggs is blocked until then.

All rights reserved © Reesh 2026

Egg Store Ledger, Sales & Dispatch Vouchers

Daily egg movement matrix and official dispatch vouchers.

1 Daily Egg Grading & Classification

Classify daily production into: sound table eggs, pullet, hatching eggs, cracked, double-yolk, and cull.

2 Inventory Formula & Driver Dispatch Voucher

Closing Balance = Yesterday Stock + Today Production - Dispatched. Sales generate a PDF voucher with vehicle plate and driver phone.

Egg Grade	Opening Stock	Today Inflow	Dispatched / Sold	Closing Balance
Sound Table Eggs	140 Cartons	+85 Cartons	-120 Cartons	105 Cartons
Hatching Eggs	95 Cartons	+60 Cartons	-75 Cartons	80 Cartons
Cracked / Loose	18 Trays	+6 Trays	-20 Trays	4 Trays

Automatic Carton & Tray Conversion

Standard carton = 12 trays × 30 eggs = 360 eggs. The app converts between cartons, trays, and loose eggs automatically.

All rights reserved © Reesh 2026

Attendance System & Payroll Reports

Three independent tiers, missing-day banner, and payroll exports.

1 **Three Independent Attendance Tiers**
Engineers log farm workers; supervising/field vets log engineers; company owners/admins log veterinarians.

2 **Smart Missing-Days Banner (Last 14 Days)**
The system scans the past 14 days and displays an amber banner for any unrecorded dates—tap any date chip to log it immediately.

Staff Category	Recorded Daily By	Audited & Printed By
Farm Workers	Farm Engineer	Owner, Supervising Vet & Accountant
Agricultural Engineers	Supervising Vet, Field Vet or Owner	Company Owner & Accountant
Veterinarians	Company Owner or Supervising Vet	Company Owner & Accountant

Attendance Continues Between Flock Cycles
Attendance is tied to the monthly calendar rather than active cycles, ensuring seamless payroll during farm cleanout periods.

All rights reserved © Reesh 2026

Petty Cash Custody & Financial Vouchers

Matches official accounting ledgers with automated wording.

1

Opening Custody & Receipt Voucher Top-Ups

Open a custody sheet with an initial advance; linking an approved receipt voucher automatically increases the custody balance.

2

Itemized Expenses & Cost Centers

The engineer logs each expense with its cost center (Barn 1, Generator, Maintenance, Kitchen), invoice number, and date.

Voucher #	Date	Description	Cost Center	Amount
#00101	2026-10-22	Standby generator diesel	Generator Unit	EGP 4,200
#00102	2026-10-25	Cooling pad maintenance	Barn 1	EGP 2,450
#00103	2026-10-28	Disinfectants & supplies	General Farm	EGP 1,500

Official Custody Settlement PDF

Custody sheets print in a ruled ledger layout complete with signature blocks for Custody Holder, Accounting, and Chairman.

All rights reserved © Reesh 2026

Consolidated Reports & Official Dual Header

Your company logo and identity on every Arabic and English report.

1 **Standardized Dual-Logo Report Header**

All PDF reports feature a standardized header: in Arabic, Reesh logo on the right and Company logo on the left (reversed in English).

2 **Three-Line Centered Title Hierarchy**

Centered between the logos: (1) Reesh Poultry Farm Management, (2) Your Company Name, (3) Farm Name & Report Title.

3 **One-Click Consolidated PDF Export for All Roles**

The "Export Consolidated PDF" button is available in Cycle Management, Report History, Cycle Archive, and all Attendance screens.

All rights reserved © Reesh 2026

Team Management, Backups & Devices

Protect company data, upload your logo, and manage staff.

1 **One-Click Company Logo Upload**
In Settings, the Company Owner clicks "Upload Logo" and picks an image file to apply it across the app and all PDF reports.

2 **Export & Restore Local Backups**
From the Backup screen, export a password-protected backup file of all your company data and restore it anytime.

Management Feature	Location in App	Practical Benefit
Company Logo Upload	Settings -> Company Logo	Displays your brand on headers and all PDFs
Replace Engineer	Engineers / Farm Setup	Instant session revoke while keeping audit history
Local Backup	Settings -> Backup	Keep an extra password-protected copy on your drive

All rights reserved © Reesh 2026

What Should I Do If... (1)

Quick practical answers to common daily questions.

1 **Forgot a Password or Need to Edit a Staff Account?**
The Company Owner or Supervising Vet can edit staff details from the respective management screen or contact support.

2 **A Red "Drug Withdrawal Hold" Banner Appeared?**
This means the flock received medication whose withdrawal period has not expired. Wait until the stated date before marketing.

3 **Forgot to Record Attendance Yesterday?**
Open the Attendance screen and tap the missed date chip inside the top amber banner to record it immediately.

4 **Missed a Daily Barn Report for a Previous Day?**
Tap "Request Missed Day" on the Daily Report screen; once the Supervising Vet approves, log the report and balances cascade automatically.

All rights reserved © Reesh 2026

What Should I Do If... (2)

Managing cash custody, subscriptions, devices, and data.

1 **Need to Top Up an Engineer Cash Custody Mid-Cycle?**
In Treasury & Custody, open "Receipt Vouchers", issue a new receipt linked to the active custody sheet, and the balance updates automatically.

2 **Your 21-Day Free Trial Period Ended?**
All your farms, cycles, and reports remain 100% intact. Enter your official license code to continue right where you left off.

3 **Replaced Your Computer or Smartphone?**
Contact support via WhatsApp to reset your code device slots and activate your new hardware immediately at no cost.

4 **Engineer Typed Two Drugs Together in One Line?**
The app detects the "+" symbol and shows an "Auto-Split" button to separate them into individual rows with distinct withdrawal days.

Everyday Farm Situations & Workflows

How team roles coordinate inside Reesh during emergencies.

1

Scenario 1: Sudden Mortality Spike or Water Drop

(1) Engineer logs actual figures. (2) Supervising Vet receives an instant alert. (3) Vet prescribes treatment and withdrawal hold.

2

Scenario 2: Farm Silo Feed Stock Running Low

(1) Low silo balance shows on the dashboard. (2) Management arranges delivery. (3) Engineer logs the new shipment under "Incoming Feed".

3

Scenario 3: Emergency Generator or Cooling Failure at Night

(1) Engineer pays repair costs immediately from petty cash. (2) Logs item with invoice and cost center. (3) Accountant audits and approves next morning.

One Connected Real-Time Loop

Reesh connects the engineer, veterinarian, accountant, and owner in real time—eliminating paper delays and protecting farm assets.

All rights reserved © Reesh 2026

Farm & Accounting Glossary

Plain, clear definitions of terms used across reports.

Term	Plain Meaning & How It Is Calculated
Feed Conversion Ratio (FCR)	Kilograms of feed consumed to produce 1 kg of live weight (lower means higher profitability).
European Efficiency Index (EPEF)	Global index combining livability %, average weight, age, and FCR into one performance score.
Hen-Day Production %	Total eggs produced on a given day divided by live females in the barn × 100.
Hatch of Fertile (HOF %)	Good hatched chicks divided by fertile eggs set in the hatchery × 100.
Drug Withdrawal Period	Mandatory waiting days after the last medication dose before marketing birds or eggs.
Rearing Cost Capitalization	Accumulating pullet rearing expenses prior to lay as the capitalized flock asset value.
Petty Cash & Tafqeet	Cash advance issued to the engineer settled via invoices, with amounts written in words.
Smart Engineer Replacement	Revoking a departing engineer login while preserving all their past logs for prorated payroll.

All rights reserved © Reesh 2026
