Official Edition — Complete User Guide

REESH

Poultry Farm Management

Complete User Guide

From download and first launch to daily farm operations: for owners, veterinarians, farm engineers and accountants.

Company Owner | Supervising Vet | Farm Engineer | Field Vet | Accountant

Table of Contents

Click any title to jump straight to its page.

Quick Start: Download & Install — Get the software, Windows security prompt, mobile app — P. 3

Quick Start: Sign-In & Activation Code — Sign in, create your company, free trial — P. 4

Quick Start: First Farm & First Cycle — Add farm, house and place chicks — P. 5

Company Owner Guide — Daily oversight and approvals — P. 6

Supervising Vet Guide — Technical oversight and vaccine plans — P. 7

Farm Engineer Guide — A complete working day in the house — P. 8

Field Vet Guide — Inspection, treatment, safety periods — P. 9

Accountant Guide — Cash advances, sales, payroll — P. 10

Farms, Houses & Multiple Engineers — Assign engineers and replace with records kept — P. 11

The Four Production Types & Cycles — Broiler, Sasso, Layer, Breeder — P. 12

The Daily House Report — Mortality, feed, water, weights — P. 13

Health, Vaccines & Safety Period — Blocks marketing during treatment — P. 14

Egg Store & Sales — Grading, balances and sales — P. 15

Attendance & Payroll — Three groups and missed-day alert — P. 16

Cash Advances & Vouchers — Spending, settlement, approval — P. 17

Reports & Official Header — Performance indicators, printing with your logo — P. 18

Team, Backups & Devices — Manage accounts and protect your data — P. 19

What Should I Do If… (1) — Password, safety period, missed attendance — P. 20

What Should I Do If… (2) — Cash advance, new device, backup restore — P. 21

Everyday Farm Situations — Practical steps for four common cases — P. 22

Farm Glossary — Plain explanations of terms — P. 23

Support & Contact — How to reach us — P. 24

All rights reserved © Reesh 2026

Step 1: Download & Install

On your computer and on your phone.

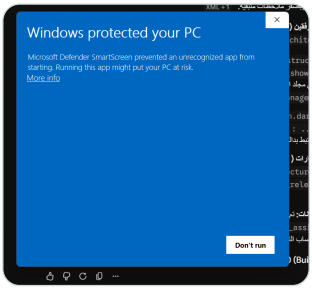

1 **Open the official website**

Visit the official Reesh website and press the download button you need: Windows, Android, or open the app online.

2 **Install on your computer**

When you open the installer, a blue window "Windows protected your PC" may appear. This is normal. Press "More info", then "Run anyway".

3 **Install on your phone**

Download the app file on your Android phone. If the phone asks for permission to install, allow it once, then open the app.

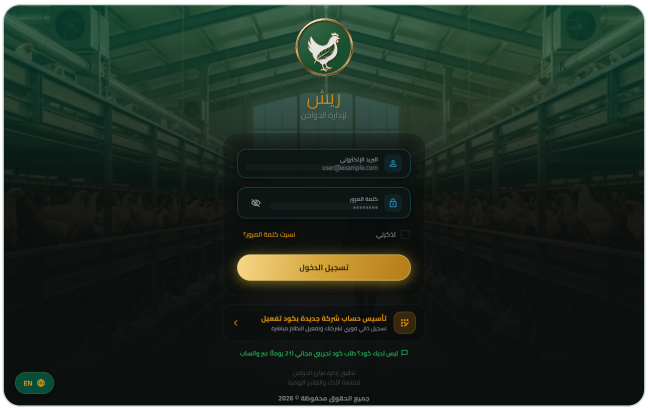

> **Tip**
> Managers and accountants work comfortably from the computer; engineers record from their phones in the farm. Everyone sees the same data.

All rights reserved © Reesh 2026

Step 2: Sign-In & Activation Code

For existing users and new companies.

1. **Already have an account?**
   Enter your email and password, then press "Sign In".

2. **New company with an activation code**
   Press "Create a new company account with an activation code", enter the code you received, then your company name and manager details. Registration takes minutes.

3. **Free 21-day trial**
   Request a free trial code by contacting us on WhatsApp (see the Support page).

Changing your device

Your code covers a set number of devices. When you replace a device, remove the old one from the devices screen and activate the new one.

All rights reserved © Reesh 2026

Step 3: First Farm & First Cycle

Four steps and you are running.

1. **Add the farm**
   From the menu choose "Farms" then "Add Farm". Enter name, location and activity type.
2. **Add the house**
   Inside the farm press "Add House" and enter its number and bird capacity.
3. **Start the cycle**
   From "Cycles" press "New Cycle". Choose the activity, breed, placement date, chick count and chick age on arrival.
4. **Assign the engineer**
   Pick the responsible engineer so he can start daily recording from his phone right away.

Illustrative example (hypothetical names)

Stage	What is entered	Who
Farm	Al-Amal Farm	Owner
House	House 1 — 25,000 birds	Supervising vet
Placement	24,500 chicks, 1 day old	Vet & engineer

All rights reserved © Reesh 2026

Company Owner Guide

The full picture across all farms.

Company Owner / General Manager

Full control

The highest authority in your company

What you do:

- Views the dashboard: bird counts, mortality and weights across all farms.
- Adds team members and assigns farms to them.
- Records vet attendance and reviews engineer attendance.
- Reviews cash advances, major expenses and bird/egg sales.
- Uploads the company logo to appear on every printed report.

What you cannot do: No restrictions; technical corrections are best routed to the supervising vet.

Total birds	Today's mortality	Today's sales	Open advances
94,200	0.08 %	EGP 185,000	EGP 35,000
Example: 4 farms	Example	Example	Example

Morning routine

Open the dashboard and check the red and orange alerts. Any red alert deserves an immediate call to the supervising vet.

All rights reserved © Reesh 2026

Supervising Vet Guide

In charge of the technical side of the farms.

Supervising Veterinarian

Technical oversight

Manages cycles, engineers and health programs

What you do:

- Opens new cycles and tracks growth against the breed standard.
- Assigns engineers to farms, adds a second one, or replaces one.
- Records engineer attendance daily.
- Sets vaccine and treatment schedules and checks that engineers follow them.
- Produces technical performance reports.

What you cannot do: Cannot edit final financial accounts; the role is technical only.

Your daily routine

1. **Review morning reports**
   Watch for any sudden drop in water intake: it is the first sign of disease.
2. **Record engineer attendance**
   From the engineer attendance screen: present / absent / leave.
3. **Watch drug safety periods**
   Make sure no house is marketed while its safety period is still active.

All rights reserved © Reesh 2026

Farm Engineer Guide

Your day in the house, step by step.

Farm Engineer

Daily operations

Directly responsible for the houses and daily recording

What you do:

- Records the daily report: mortality, feed, water, temperature and weights.
- Records farm worker attendance.
- Runs the egg store on layer and breeder farms.
- Spends from the cash advance and records every voucher.

What you cannot do: Cannot open new cycles, edit vaccine schedules or closed days.

Time	Task
7:00 AM	House round, count mortality, check feed and water
8:30 AM	Record worker attendance
2:00 PM	Enter the daily report
6:00 PM	Egg store and expense vouchers

Error protection

The app will not let you record the same house feed twice on the same day.

All rights reserved © Reesh 2026

Field Vet Guide

Health, treatment and food safety.

Field Veterinarian

Health & food safety

Inspects flocks and prescribes treatment

What you do:

- Visits the houses and checks the general condition of the flock.
- Records post-mortem findings and diagnosis.
- Records the treatment and the safety period required before marketing.
- Records engineer attendance during his visits.

What you cannot do: Cannot interfere with financial accounts or feed prices.

Treatments screen: shows dose, duration and usage warnings.

Consumer safety

Any house with an active safety period shows a red alert and must not be marketed until the stated date passes.

All rights reserved © Reesh 2026

Accountant Guide

Money, advances and payroll.

Accountant

Financial (view-only on technical)

Handles the financial side and can view everything without editing technical data

What you do:

- Issues cash advances to engineers, reviews their invoices and approves settlement.
- Issues receipts for bird and egg sales.
- Reviews attendance and exports the payroll sheet.
- Exports financial reports as PDF and Excel.

What you cannot do: Can view farm data but cannot edit mortality, feed or vaccinations.

The cash advance cycle

1. **Issue the advance**
   The app writes the amount in Arabic words automatically to avoid any doubt.
2. **Follow expenses**
   You see the engineer vouchers as soon as they are recorded.
3. **Approve settlement**
   Review the invoices, then press approve to close the advance.

Month end

From the attendance screen press "Export payroll" for a full sheet of present, absent and leave days.

All rights reserved © Reesh 2026

Farms, Houses & Multiple Engineers

Flexible operation with every record kept.

1. **Farms and houses**
   Add as many farms as you need, and inside each farm add houses with capacity and ventilation type.
2. **More than one engineer per farm**
   Assign a lead engineer and an extra engineer; both have the same recording permissions.
3. **Replacing an engineer**
   When you replace an engineer, responsibility moves to the new one and the old engineer keeps his records for fair settlement.

Example: Al-Amal Farm (hypothetical names)

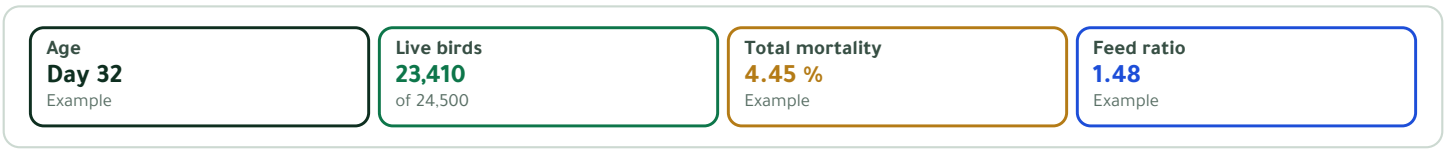

Role	Name	From	Status
Lead engineer	Eng. Ahmed	2026-09-01	Active
Extra engineer	Eng. Mahmoud	2026-10-15	Active
Former engineer	Eng. Mostafa	2026-06-01	Records kept

All rights reserved © Reesh 2026

The Four Production Types & Cycles

Pick your activity and the app adapts to it.

1. **White broiler**
   Short cycle (30-40 days) focused on weight, mortality and feed use.
2. **Sasso & colored breeds**
   Medium cycle (55-70 days) with growth standards for the breed.
3. **Table-egg layers**
   Long cycle with daily production percentage and egg grading.
4. **Broiler breeders**
   Separate tracking of hens and roosters, and hatching-egg sorting.
5. **Closing the cycle**
   After the last batch is sold, close the cycle to see the profit-and-loss report.

All rights reserved © Reesh 2026

The Daily House Report

One organized record for every day.

1. **Mortality**
   Enter morning and evening mortality and the cause.
2. **Feed**
   Enter the quantity in bags or tons with the feed type. The app blocks duplicate entries for the same house on the same day.
3. **Water and temperature**
   Record water used, temperature and humidity. A drop in water is an early warning.
4. **Weights**
   Record weight samples to see whether the flock is ahead of or behind the standard.

Item	Value (example)	Assessment
Daily mortality	18 birds	Normal
Feed	1,450 kg	Recorded once
Water	2,900 L	Normal
Average weight	1,890 g	Above standard

Early warning
A drop in water intake comes a day or two before illness or rising mortality. Do not ignore it.

All rights reserved © Reesh 2026

Health, Vaccines & Safety Period

Health control that protects flock and consumer.

1 Vaccination program

The app shows a schedule of vaccines and treatments by flock age. Tap any item to see dose, method and notes.

2 Automatic matching

When the engineer records a drug in the daily report, the app ticks the matching item by itself.

3 Safety period

After some drugs you must wait several days before selling. The app shows a red alert until the period ends.

Example: House 1 is under a safety period until 2026-11-04. Do not market before that date.

All rights reserved © Reesh 2026

Egg Store & Sales

For layer and breeder farms.

1. **Grading production**
   Record sound, broken, cracked and loose eggs every day.
2. **Balance calculation**
   Balance = opening stock + received from houses − sold or dispatched. Nothing leaves without a recorded order.
3. **Selling to customers**
   When a sale is recorded the value is calculated and the accountant is notified to issue a receipt.

Type	Opening	Received	Dispatched	Closing
Sound table eggs	140 cartons	+85	-120	105 cartons
Hatching eggs	95 cartons	+60	-75	80 cartons
Broken & cracked	18 trays	+6	-20	4 trays

The carton
Standard carton = 12 trays × 30 eggs = 360 eggs; the app converts between trays and cartons automatically.

All rights reserved © Reesh 2026

Attendance & Payroll

Three groups, each with its own recorder.

1. **Farm workers**
   The farm engineer records them daily: present / absent / leave / sick / permission.
2. **Engineers**
   Recorded by the supervising vet, field vet or owner, so an engineer never records his own attendance.
3. **Veterinarians**
   Recorded by the owner or general manager to document their visits.
4. **Forgot yesterday?**
   An orange banner appears at the top; tap it and record the missed day.
5. **Payroll**
   Export the monthly sheet as PDF or Excel to calculate wages and deductions.

Group	Recorded by	Reviewed by
Farm workers	Farm engineer	Supervising vet & owner
Engineers	Supervising or field vet	Accountant & owner
Veterinarians	Company owner	Accountant

All rights reserved © Reesh 2026

Cash Advances & Vouchers

A clear financial cycle from spending to approval.

1. **Issuing the advance**
   The accountant or owner gives the engineer an amount for emergency costs (fuel, repairs, day labor); the amount is also written in words automatically.
2. **Recording vouchers**
   The engineer records each expense with invoice number, vendor and description, and sees the remaining balance instantly.
3. **Settlement**
   When finished the engineer submits a settlement; the accountant reviews and approves it or rejects unmatched items.

Example: advance EGP 10,000 — remaining EGP 1,850

Voucher	Date	Description	Amount
#101	2026-10-22	Generator diesel	EGP 4,200
#102	2026-10-25	Feed belt repair	EGP 2,450
#103	2026-10-28	Cleaning supplies	EGP 1,500

All rights reserved © Reesh 2026

Reports & Official Header

Reports ready to print and deliver.

1. **Performance indicators**
   The app calculates the feed conversion ratio (kg of feed per kg of meat) and the European efficiency index, combining survival, weight and age into one number.
2. **Official header**
   Every printed report carries the Reesh logo, your company logo, the company name and the farm name. Logo positions swap automatically with the report language.
3. **Export**
   Export any report as PDF for printing or Excel for accountants.

All rights reserved © Reesh 2026

Team, Backups & Devices

Keep your data and your team in order.

1. **Managing the team**
   Add engineers, vets and accountants, edit their details, or deactivate someone who left while keeping their past reports.
2. **Backup**
   From the backup screen press save to get a full file of your company data; keep it on an external drive.
3. **Restore**
   On a new device choose "Restore from file", select your backup and the app brings back all your data.
4. **Devices**
   From the devices screen you can remove an old device to activate a new one without a new code.

Area	Action	Benefit
Team accounts	One-tap deactivate	History preserved
Backup	Save a file	Restore in emergencies
Devices	Remove & activate	Easy device change

What Should I Do If... (1)

Quick answers for the most common situations.

Forgot your password?
Press "Forgot password" on the sign-in screen, enter your email and you will receive a link to set a new one.

See a "safety period" alert?
It means the house received a treatment whose safety period has not ended. Do not sell birds or eggs until the stated date.

Forgot yesterday's attendance?
Tap the orange banner at the top of the attendance screen and record the missed day.

How do I add a second engineer to a farm?
From the engineers screen choose the farm, then "Assign extra engineer".

All rights reserved © Reesh 2026

What Should I Do If... (2)

Money, devices and data.

Advance balance does not match invoices?
During settlement the accountant records the shortage or surplus with a note, and the advance is settled formally.

Changed your computer or phone?
From the devices screen remove the old device, then enter the activation code on the new one. No extra fees.

Free trial ended?
All your data is safe. Enter your subscription code and continue where you stopped.

Want to restore your data?
From the menu choose "Backup" then "Restore from file" and select your saved file.

All rights reserved © Reesh 2026

Everyday Farm Situations

Practical steps for common cases.

1. **Sudden rise in mortality**
   1) Record the real count right away. 2) Notify the supervising vet. 3) The vet inspects and records diagnosis and treatment.
2. **Feed is running low**
   1) Record the remaining amount in the report. 2) The accountant checks purchase orders. 3) Management arranges an urgent delivery.
3. **Egg count difference**
   1) Count physically and compare with yesterday's balance. 2) Record breakage as its own item. 3) The accountant approves the adjustment.
4. **Generator or cooling failure**
   1) Repair immediately from the cash advance. 2) Record the voucher with the workshop name and invoice. 3) The accountant approves it later without delaying work.

One team
Reesh connects engineer, vet, accountant and owner in one loop so decisions arrive on time.

All rights reserved © Reesh 2026

Farm Glossary

Plain explanations, no complexity.

1. **Feed conversion ratio**
   How many kg of feed a bird eats to gain 1 kg of meat. Lower is better (ideal 1.45 to 1.55).
2. **European efficiency index**
   One number combining survival, average weight, age and feed ratio to measure how well a cycle was managed.
3. **Drug safety period**
   The wait after the last treatment dose before selling birds or eggs.
4. **Egg carton**
   360 eggs (12 trays × 30 eggs).
5. **Placement**
   Receiving chicks in the house and recording their number and age to start counting days.
6. **Amount in words**
   Writing the amount in words next to the number to prevent tampering.
7. **Cash advance**
   An amount given to the engineer for emergency costs, settled later with invoices.
8. **Total mortality**
   Total dead since placement divided by birds placed × 100.
