Certified 2026 Edition

REESH POULTRY ERP

Comprehensive Farm & Flock Management System

Complete Operational & User Manual

An executive operational manual for farm owners, supervising veterinarians, field engineers, and financial accountants to manage broiler, layer, and breeder flocks, vaccination schedules, drug withdrawal safety, petty cash custody, and attendance reporting.

Hybrid Cloud & Local Architecture | Cryptographic Security | Bilingual Executive Reports

Interactive Table of Contents

Click any chapter to navigate directly to its detailed operational guide:

Chapter 1: Quick Start, Installation & Self-Registration P. 3
Bypassing SmartScreen, login, and instant company activation with code

Chapter 2: Enterprise Role Matrix & Access Control (RBAC) P. 4
Company Owner, Supervisor Vet, Field Engineer, Field Vet, and Accountant

Chapter 3: Farm Infrastructure & Multi-Engineer Management P. 5
Adding houses, multiple engineers per farm, and smart replacement logs

Chapter 4: Flock Cycles & 4 Commercial Poultry Sectors P. 6
White Broiler, Sasso, Commercial Layer, and Broiler Breeder management

Chapter 5: Daily House Reports V2 & Feed Auditing Engine P. 7
Mortality reasons, feed double-counting guard, water, and sample weights

Chapter 6: Veterinary Health Protocols & Drug Withdrawal Guard P. 8
Standard vaccine plans, automatic matching, and pre-slaughter safety hold

Chapter 7: Daily Egg Storage Movement Matrix & Flock Sales P. 9
Egg grading (sound, broken, crack), inventory balance, and delivery receipts

Chapter 8: Three-Tier Intelligent Attendance & Payroll Engine P. 10
Worker, engineer, and vet attendance, missing banner, and payroll exports

Chapter 9: Financial Management, Petty Cash & Payment Vouchers P. 11
Custody assignment, Arabic tafqeet numbers, receipts, and accountant audits

Chapter 10: Executive Reports, Biological KPIs & Dual-Logo PDF P. 12
FCR, EPEF index, bilateral executive headers, and PDF/Excel export

Chapter 11: Staff Management, System Security & HMAC Backups P. 13
Role assignments, encrypted local backups, and licensed device resets

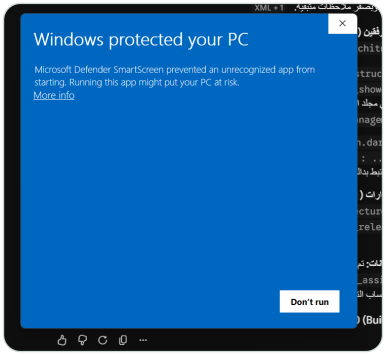

Chapter 12: Customer Support Channels & Continuous Updates P. 14
Official promo portal, web app, WhatsApp support, and seamless updates

Chapter 1: Quick Start, Installation & Self-Registration

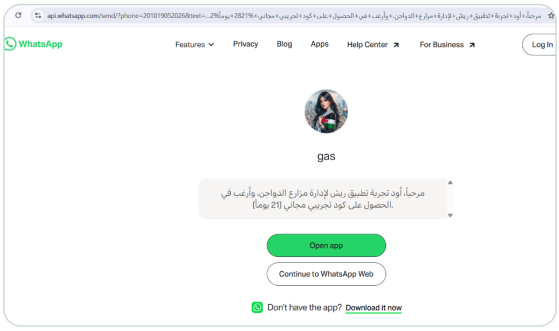

Deploying and initializing Reesh across desktop, mobile, and web:

1. **Download Official Setup Package**
   Visit the official Reesh portal (reesh-erp.vercel.app) to download the Windows installer, Android APK, or launch the web app directly.
2. **Bypassing Windows SmartScreen Defender**
   On initial Windows installation, Microsoft Defender SmartScreen might appear; click "More info" and select "Run anyway" to proceed.

All Rights Reserved © Reesh System 2026

3 **Sign In or Instant Self-Registration with Code**
Existing users enter email and password. New enterprises enter via "Set Up New Company with Activation Code" to register their organization instantly.

Prospective enterprises can test the full capabilities of Reesh for 21 days free of charge by clicking the WhatsApp link at the bottom of the sign-in screen to receive an instant activation key.

Chapter 2: Enterprise Role Matrix & Access Control (RBAC)

Strict separation of operational, medical, and financial duties:

1. Company Owner / Executive Leadership

- Supreme authority over all farms, flocks, finances, company branding, and staff assignments.
- Record and audit attendance for field engineers and veterinarians; approve major disbursements.
- Assign management roles and govern subscription tiers across facilities.

2. Supervising Veterinarian / System Admin

- Manage farm structures, open flock cycles, assign engineers, and monitor biological growth curves.
- Record engineer attendance, approve medical protocols, and document necropsy findings.
- Export consolidated analytical reports compared against breeder genetic standards.

3. Field Farm Engineer

- Log daily house data: mortality, feed bags/tons consumed, water intake, temperatures, and sample weights.
- Take daily worker attendance and record leave/absence requests.
- Manage egg storage movements and record emergency petty cash expense vouchers.

4. Field Veterinarian

- Perform clinical flock inspections, record necropsy findings, and enforce drug withdrawal safety periods.

All Rights Reserved © Reesh System 2026

- Log daily attendance for field engineers across assigned production units.

5. Financial Accountant / Account Manager

- Reconcile petty cash custody statements, approve payment vouchers, and audit egg/bird sales receipts.
- Access worker and engineer attendance records to compute payroll, deductions, and bonuses.
- Protected by strict RLS policies: read-only access to technical data without modification permissions.

Chapter 3: Farm Infrastructure & Multi-Engineer Management

Operational flexibility while preserving all historical records:

1. **Configuring Farms and Production Houses**
Company owners and supervisor admins can configure farms, specify geographical locations, and define house capacities and ventilation setups.

2. **Co-Engineer Feature (Multiple Engineers per Farm)**
The platform supports assigning multiple engineers to a single farm (Lead Engineer and Co-Engineer), giving both full access to log daily reports, egg inventories, and worker attendance.

3. **Smart Replacement Engine**
When replacing an engineer, the smart replacement feature transfers active operational duties to the incoming engineer while preserving all past attendance, expenses, and logs of the outgoing engineer for fair payroll accounting.

Farm & Engineer Assignment Management Console — LIVE ERP INTERFACE

Facility #1: Modern Desert Broiler Complex — Houses 1 & 2 — Status: Active | Broiler Flock

Assignment Role	Engineer Name	Effective Date	Account Status	Operational Scope
Lead Farm Engineer	Eng. Ahmed Khaled	2026-09-01	Active Assigned	Primary operational authority
Co-Engineer (Assigned)	Eng. Mahmoud Tarek	2026-10-15	Active Assigned	Full co-reporting permissions
Archived Past Engineer	Eng. Mostafa El-Shafei	2026-06-01	De-assigned	Historical audit logs preserved

Chapter 4: Flock Cycles & 4 Commercial Poultry Sectors

Specialized enterprise workflows covering all major poultry activities:

1. **Commercial White Broiler**
Fast 30-40 day cycles focusing on Feed Conversion Ratio (FCR), cumulative mortality %, average daily gain, and feed intake per bird.

2. **Sasso / Colored Broiler**
Medium-term 55-70 day cycles with customized growth standards and body weight distribution curves for colored and rustic breeds.

3. **Commercial Table Egg Layer**
Extended 80-90 week cycles tracking Hen-Day Production %, egg grading (cartons/trays/loose), and capitalized rearing cost engines.

4. **Broiler Breeder (Parent Stock)**
Distinct female and male tracking (mortality, feed, body weight), hatching egg segregation, spiking management, and hatchery setting yields.

5. **Chick Housing Age Precision & Cycle Settlement**
At placement, chick age is logged to ensure pinpoint age calculations throughout the flock. Upon marketing, cycles are settled for final financial P&L.

Flock Cycle Dashboard & Biological KPIs — LIVE ERP INTERFACE

All Rights Reserved © Reesh System 2026

Flock Age	Live Population	Cumulative Mortality	Cumulative FCR
Ross 308 Genetics	Initial: 24,500	Standard: < 4.8%	High Efficiency

Average Body Weight: 1,890 g (Breeder Standard: 1,840 g | +50 g) Cumulative Feed Consumed: 68.4 Tons

Chapter 5: Daily House Reports V2 & Feed Auditing Engine

Rigorous daily biological and operational data collection:

1. **Logging Daily Bird Mortality & Reasons**
   Engineers record daily dead birds along with clinical root causes (natural culls, digestive, respiratory, or mycotoxin issues).
2. **Feed Double-Counting Guard & Ration Types**
   Feed consumption is entered in 50kg bags or metric tons (Starter 23%, Grower 21%, Finisher 19%, or Layer feed). A built-in guard prevents duplicate entries for the same house on the same day.
3. **Water Intake & Environmental Climate**
   Logs daily water intake in liters (an early clinical health indicator), min/max ambient temperatures, and relative humidity %.
4. **Periodic Body Weight Sampling**
   Documents periodic test-weighing sample statistics to evaluate flock uniformity and Average Daily Gain (ADG).

Daily House Report Entry Console V2 LIVE ERP INTERFACE

Operational Item	Logged Value	Unit / Details	Genetic Benchmark	Audit Status
Daily Mortality	18	Birds	0.07% (Safe green zone)	Auto-Audited [Verified]
Feed Consumed	1,450	kg (Grower 21%)	118 g / bird / day	No duplicates [Verified]
Water Consumed	2,900	Liters	Water:Feed ratio = 2:1	Optimal range [Verified]
House Temp (Min / Max)	24° / 28°	Celsius	Conforms to Day 32	Controlled [Verified]
Average Body Weight	1,890	Grams	+50 g ahead of standard	High gain [Verified]

Chapter 6: Veterinary Health Protocols & Drug Withdrawal Guard

Biosecurity enforcement, medication tracking, and food safety:

1. **Standard Vaccination & Health Protocols**
   Upload predefined vaccination and therapeutic programs mapped to breed specifications (Hatchery, Newcastle, Gumboro, IB, AI, vitamins).
2. **Intelligent Medication Matching Engine**
   When an engineer enters a treatment in the daily report, the system identifies the drug and links it to the corresponding protocol milestone.
3. **Cross-Day Drug Withdrawal Guard**
   A strict safety guard tracks pharmaceutical active ingredients and statutory withdrawal periods, issuing prominent alerts if any flock is within an active withdrawal window to prevent early marketing or slaughter.

Active Pharmaceutical Withdrawal Safety Console LIVE ERP INTERFACE

All Rights Reserved © Reesh System 2026

Medication / Vaccine	Flock Age Range	Route of Admin	Mandatory Withdrawal	Marketing Status
Tylosin Tartrate 100%	Days 25 - 27	Drinking Water	5 Full Days	Hold active until 2026-11-04 [Hold Active]
Biological Mycotoxin Binder	Days 28 - 29	Drinking Water	0 Days (No hold)	Marketing Clear [Verified]
Vitamin E + Selenium	Days 30 - 31	Drinking Water	0 Days (No hold)	Marketing Clear [Verified]

Chapter 7: Daily Egg Storage Movement Matrix & Flock Sales

Comprehensive inventory ledger for commercial layers and parent stock:

1. **Daily Egg Grading and Collection**
   Logs daily egg collection categorized into: Grade-A sound eggs (cartons/trays), cracked, broken, double-yolk, and loose ungraded eggs.
2. **Egg Inventory Matrix Ledger**
   Enforces strict accounting formula: (Opening Balance + Daily House Production - Dispatches/Sales = Closing Inventory). Dispatches require valid delivery orders.
3. **Integrated Invoicing and Customer Ledger**
   Sales dispatches compute financial totals automatically based on prevailing market tray prices, feeding into customer accounts receivable.

Daily Egg Storage Movement Matrix Ledger — LIVE ERP INTERFACE

Egg Category & Grade	Opening Stock	Daily House Inflow	Dispatches (Sales / Setting)	Closing Warehouse Stock
Commercial Grade-A (Carton of 360)	140 Cartons	+ 85 Cartons	- 120 Cartons (Al-Amal Co.)	105 Cartons
Hatching Eggs (Certified Setting)	95 Cartons	+ 60 Cartons	- 75 Cartons (Hatchery Unit)	80 Cartons
Cracked & Culinary Eggs (Loose Trays)	18 Trays	+ 6 Trays	- 20 Trays (Local Market)	4 Trays

Chapter 8: Three-Tier Intelligent Attendance & Payroll Engine

Strict auditing tiers, missing day banner, and payroll reporting:

1. **Tier 1: Farm House Workers**
   Recorded daily by the field farm engineer for house laborers, cleaning staff, and feeders (Present, Absent, Leave, Sick, or Permission).
2. **Tier 2: Agricultural Field Engineers**
   Recorded by the Supervising Veterinarian, Field Vet, or Enterprise Owner, providing independent supervisory oversight.
3. **Tier 3: Veterinarians & Clinical Inspectors**
   Logged by the Enterprise Owner or General Manager to document field inspections and clinical consultancy visits.
4. **Missing Attendance Banner & Grace Log**
   If an engineer forgets to record yesterday's attendance, an alert banner appears at the top, enabling instant retroactive logging without complex workflow hurdles.
5. **Payroll Export Formats (PDF & Excel)**
   Exports certified monthly and proportional staff attendance sheets directly for the accounting department to calculate payroll, bonuses, and deductions.

All Rights Reserved © Reesh System 2026

Three-Tier Attendance & Smart Notification Console — LIVE ERP INTERFACE

[ALERT] Smart Alert: House #2 worker attendance missing for yesterday (2026-10-31)

Staff Tier	Logged By	Audited By	Payroll Export Formats
House Laborers & Feeders	Field Farm Engineer	Supervisor Vet & Enterprise Admin	Monthly / Proportional PDF & Excel
Agricultural Engineers	Supervisor Vet or Field Vet	Accountant & Company Owner	Working hours, leaves & custody
Consulting Veterinarians	Enterprise Owner / GM	Financial Audit & Management	Field inspection mission logs

Chapter 9: Financial Management, Petty Cash & Payment Vouchers

Accounting documentation for farm purchases and emergency disbursements:

1. **Custody Issuance & Arabic Tafqeet Numbers**
Accountants issue petty cash custody to the farm engineer for operational expenditures (fuel, plumbing, maintenance). Numbers are formatted with Arabic words (tafqeet) to eliminate tampering.

2. **Expense Vouchers & Invoice Attachments**
The engineer records expenses instantly, entering invoice numbers, supplier names, and descriptions, maintaining real-time cash balance visibility.

3. **Settlement Workflow & Accountant Approval**
Upon custody exhaustion, the engineer submits a settlement statement. The accountant reviews invoices, approves valid items, and reconciles the treasury.

Petty Cash Settlement Statement & Ledger (Custody Voucher) — LIVE ERP INTERFACE

Total Custody Assigned: EGP 10,000 (Ten Thousand Egyptian Pounds) — **Remaining Cash on Hand: EGP 1,850**

Voucher ID	Date Logged	Expense Description	Supplier / Vendor	Amount Spent	Approval Status
Voucher #101	2026-10-22	Diesel fuel for standby generator	Misr Petroleum Station	EGP 4,200	Audited & Approved [Verified]
Voucher #102	2026-10-25	Feed auger belt & cooling cell repairs	El-Hoda Mechanical Works	EGP 2,450	Audited & Approved [Verified]
Voucher #103	2026-10-28	Cleaning materials & barn sanitizers	El-Fagr Chemicals Co.	EGP 1,500	Audited & Approved [Verified]

Chapter 10: Executive Reports, Biological KPIs & Dual-Logo PDF

Official executive reports adhering to global standards with bilateral headers:

1. **Biological Efficiency Metrics (FCR & EPEF)**
Computes Cumulative Feed Conversion Ratio (FCR) and the European Production Efficiency Factor (EPEF), benchmarked against global primary breeder performance standards.

2. **Certified Bilateral Executive Report Headers**
All system reports (houses, workers, engineers, eggs, financials) feature a standardized executive header:
- In Arabic: Reesh logo on right, Company logo on left.
- In English: Company logo on right, Reesh logo on left.
- Center Title: Reesh System -> Enterprise Name -> Farm / House Name.

3. **High-Definition Export Formats**
Outputs vector-crisp PDF documents optimized for laser printing and electronic distribution, as well as formatted Excel spreadsheets.

Chapter 11: Staff Management, System Security & HMAC Backups

Data sovereignty, device license management, and rapid restoration:

1. **Staff Account Management & Role Delegation**
   Manage engineers, veterinarians, and accountants. Suspend departing staff immediately while maintaining all past historical records.
2. **Encrypted Local Backups (HMAC Integrity)**
   Export full company database backups with a single click. Files are secured with cryptographic signatures preventing tampering or cross-company leakage.
3. **Hierarchical Safe Restoration**
   When migrating to a new machine, the restore engine verifies signatures and reconstructs database tables hierarchically to prevent foreign key errors.
4. **Authorized Device Governance & Activation Reset**
   Activation codes are tied to authorized hardware. When replacing hardware, enterprise owners can easily reset previous device slots.

Chapter 12: Customer Support Channels & Continuous Updates

Direct enterprise support channels and seamless cloud synchronization:

Official Reesh Customer Support & Enterprise Portals:

Official Promo & Download Portal:	**https://reesh-erp.vercel.app**
Cloud Web Application:	**https://reesh-app.web.app**
Enterprise WhatsApp Support & Trials:	**+20 101 905 2026**
Official Support Email:	**support@reesh-erp.com**

Client machines receive software enhancements seamlessly without interrupting farm operations or requiring re-entry of credentials, fully preserving all historical cycles, reports, and financial ledgers.
